AWE MISSIONS · DAILY WATCH · 11 NOVEMBER 2026

Watchmen on the Wall

Verified developments, followed by analysis. Reporting cutoff: 11 November 2026, New York time.

Executive summary

WATCH	VERIFIED DEVELOPMENT
Israel / Gaza	Storm flooding damaged displaced families' tents; Israel and aid actors dispute responsibility for delayed winter supplies. AP also reports three Palestinians killed in two Israeli strikes on Wednesday; the military said it targeted militants.
Iran / Hormuz	Iran's Revolutionary Guard said a tanker caught fire after striking a mine. A UK maritime agency confirmed an incident but had not identified the vessel; whether reports describe the same event was unclear.
Russia / Ukraine	Abu Dhabi talks produced an announced major POW exchange, but no breakthrough on territory; US mediators described deep mistrust. Attacks continued during talks.
Noahide congress	Independent reporting after the Nov. 2–6 gathering documents about 50 attendees, a signed joint statement, and some ceremonial declarations before a Jerusalem beit din. It does not independently confirm a legally binding international authority.
U.S. economy	October CPI inflation was reported at 4.0% year over year, up from 3.7% in September. Some Fed officials discussed faster hikes; those are policy views, not a new Fed decision.

Verified developments

1. Israel, Gaza, and Jerusalem

Confirmed reporting: The Associated Press reported heavy rain and flooding in Gaza's makeshift camps, with tens of thousands of tents damaged. AP says the UN and aid groups report more than 150,000 tents and water pumps are ready to enter but have not been authorized. Israeli Prime Minister Benjamin Netanyahu denied Israel was responsible and blamed Hamas; AP notes he provided no evidence for his aid-seizure allegation. The same AP report says two Israeli strikes on Wednesday killed three Palestinians according to Shifa Hospital; Israel's military said the strikes targeted military operatives. These accounts are attributed to their named sources; they are not independently adjudicated here.

2. Iran conflict and Strait of Hormuz

Confirmed reporting: AP reported Iran's Revolutionary Guard said a tanker caught fire after hitting a naval mine in the Strait of Hormuz. The UK Maritime Trade Operations Center separately reported a tanker incident but had not identified the vessel or confirmed crew status; AP said it was unclear whether the two reports concerned the same event. Reuters reported maritime traffic had risen while attacks continued. No claim of a settled peace agreement is supported by these reports.

3. Russia and Ukraine

Confirmed reporting: Reuters says US-brokered talks in Abu Dhabi ended after two days with a major prisoner exchange agreed, but no announced breakthrough on territory. US envoy Jared Kushner described a lack of trust; territorial demands remain the hardest issue. Reuters reports Russia struck six large electricity substations in central Ukraine and an attack on a market in Odesa killed three, according to officials; one person was killed in a Ukrainian drone attack in Russia's Belgorod region, local authorities said. US envoys said they planned further meetings in Moscow and with President Zelenskyy.

4. Noahide Congress follow-up (standing watch)

Confirmed reporting: The Times of Israel's Nov. 6 report says around 50 self-identified Noahides attended the First International Congress in Jerusalem, Nov. 2–6. Participants signed a joint statement and some made ceremonial declarations before a Jerusalem beit din. The article describes these actions as symbolic and not required by religious law. The organizers' site had advertised the event as aiming to build shared institutions, including an International Beit Din and a founding charter. **Not independently established in the sources reviewed:** whether a charter was formally adopted, the final court structure or membership, its jurisdiction, or any state-backed legal authority. The fact of a religious gathering does not establish coercion or a world government.

5. United States: inflation and rates

Confirmed reporting: AP reports the October Consumer Price Index increased 4.0% from a year earlier, compared with 3.7% in September. AP says Dallas Fed President Lorie Logan supported two further quarter-point increases and said the Fed could move faster; Philadelphia Fed President Anna Paulson said underlying inflation remained above target while favoring gradual increases. **Current policy:** these are officials' views; the Federal Reserve had not announced a new rate decision in the cited report.

Analysis & discernment

Assessment: Today's reporting points to continuing armed conflict and humanitarian pressure: Gaza's shelter crisis and strikes, an unresolved Iran–Hormuz confrontation, and Ukraine peace talks constrained by territorial demands and mistrust. The announced prisoner exchange and continuing diplomatic contacts are concrete developments, but they do not yet show that either war is ending.

Standing Noahide watch: The post-event evidence supports that an international gathering and symbolic community-building took place in Jerusalem. It does not, by itself, demonstrate a compulsory religious system, legal authority over outsiders, or a fulfillment of biblical prophecy. Any later claims about a signed charter, formal court, state sponsorship, or concrete Temple Mount policy should be checked against primary documents and independent reporting.

Biblical framing: Scripture calls for watchfulness, truthfulness, and care for people affected by conflict. This report does not identify a person as the Antichrist or claim that a particular headline fulfills prophecy. These are interpretive boundaries, not reported facts.

What to verify next

• Whether the announced Russia–Ukraine prisoner exchange is carried out, and whether subsequent talks include European partners or produce written terms.

• Independent confirmation of aid entry into Gaza, access to winter shelter and pumping equipment, and any updated casualty accounting.

• UKMTO / maritime authority updates identifying the Hormuz incident vessel, crew status, and any causal link to a mine.

• Primary documentation from the Noahide congress: final charter, court appointments, organizational remit, and any formal Israeli government action.

• The next Federal Reserve statement and subsequent inflation data; distinguish market expectations and individual officials' views from Committee decisions.
